**MANAGEMENT OF NURSING CARE**

*Is responsive to client needs in relation to assessment and managing care, supported by nursing knowledge and evidence based research.*

**Tasks (how it is achieved):**

- Demonstrates competence and autonomy of practice in the clinical setting providing nursing care to patients with a range of needs.
- Utilises nursing knowledge and skills through reflective practice and professional judgement to provide competent care and advice. Integrating mental health, addiction and physical health frameworks.
- Completes timely systematic holistic assessments to determine actual and potential risk problems.
- Recognises recurring patterns related to monitoring and patient responses/conditions and is able to problem solve utilising assessment/monitoring data.
- Utilises assessment skills and nursing interventions to assess patient responses to treatments and adapt approaches to accommodate any changes.
- In partnership with the patient, family / whanau, develops an individualised plan of care to achieve the desired outcomes.
- Implements and coordinates the interventions to deliver the plan of care.
- Evaluates and records progress toward attainment of desired outcomes and revise the plan of care as necessary.
- Maintains clear, concise, timely accurate and current documentation within a legal and ethical framework according to national and organisational standards.
- Takes action in situations that compromise the patients safety and wellbeing.
- Participates in health education, ensuring the patient understands relevant information related to their care.
- Provides a quality, safe and responsive comprehensive assessment for people experiencing a mental health emergency. This includes assessment, diagnosis (DSM-IV) planning, implementation and evaluation.
- Utilises a systematic problem-solving approach to identify, prevent and treat actual and potential health problems to prevent illness and/or promote health.
- Initiates interventions and monitors untoward effects, reactions, therapeutic responses, toxicity and incompatibilities related to interventions.
- When appropriate provides home based treatment to support the service user within their place of residence.
- Proactively anticipates and recognises cues to a situation and predicts outcomes, referring onto other clinical team members where necessary.
- All emergency contacts will have a comprehensive risk assessment completed, including formulation of plan which is clearly documented and communicated to appropriate persons.
- Communicates care and treatment clearly and logically with the person, their family/whanau/support person in a professional and therapeutic manner.
- Actively contributes to multi-disciplinary clinical discussions on care and treatment in a professional and purposeful manner.
- Carries out function and duties of a Duly Authorised Officer under the direction of the Director of Area Mental Health Services.
- Provides mental health advice on clinical issues across settings and disciplines including the community.

**INTERPROFESSIONAL HEALTH CARE and QUALITY IMPROVEMENT**

*Evaluates the effectiveness of care and promotes a nursing perspective within the inter-professional activities of the health care team.*

**Tasks (how it is achieved):**

- Providing guidance and support to all team members including nursing students.
- Maintains and documents information necessary for continuity of care.
- Develops discharge plans in consultation with the patient and other team members.
- Contributes to the coordination of patient care to maximise health outcomes.
- Participates in quality systems, including standards of practice and service standards.
- Demonstrates an understanding of quality improvement principles with translation into nursing practice.
